Only Jesus said why there was life. He said we'll be in God's world if we're righteous.

It is because we do not know exactly why we are here that some say that life would be a coincidence. This is a short-term vision that does not take into account our universe's beauty.

But life was a coincidence for the first God only, since the universe is so ordered that someone or something organizes it.

Life is getting slower and slower the more we go towards the little one. So there would be infinite speed in remote areas. It was to regulate the infinite speed that life was born by chance.

The first God was actually born by chance, probably because of an infinite universe's speed. Life is a miracle and allows you to finally contemplate the universe.

Life is about souls that make our world moving to animate it. The universe is also alive just like plants.

Mind is life's culmination. It allows you to become world's aware. God has a spirit too. But it is possible that there were plants when the first God was created.

My Notes

Write about life's creation.
