---

Our body cannot function on its own with the matter that does it. This is what we tell when we study the body's system as a whole. So if our body cannot function on its own, there must be something that makes it living.

That makes the body working is the soul. It is not known what it is made of, how it is made. But we know that another totally different universe makes ours work. You will see evidence of this in the next chapter.

Near-Death Experiences show the soul that we don't see. You'll have the eternity to see this if you're right. For now, it's about you becoming wise and free.

### **My Notes**

Write about another universe after watching David ELBAZ.
